System Requirements and Documentation

Contents

1 System Requirements

This chapter contains a comprehensive list of all requirements for the system. The order of the requirements is arbitraryly selected and does not indicate the importance of a specific requirement in comparison to any other.

1.1 Functional Requirements

All rqequirements which deal with the functionality of the programm will be listed in this section.

- All files should be copied from a given source directory to a given destination directory.

- (If specified) All files that math any of the given fileextentions should be copied from a given source directory to a given destination directory.

- The structure of the copied directory has to be preserved.

  - Exception: If a subdirectory of the copied source directory does not contain any (matching) files it may be ignored and not be included in the destination directory.

- There should not be any loss of data, except the files, which do not match the extentions specified by the user.
